Model 3300

Single-Channel Portable Leslie

Designed for the Professional
Touring Musicians

Model 3300

Model 3300 portable Leslie has been designed with the professional touring musician in mind. This single-channel Leslie features a two-speed horn rotor utilizing our famous Ferro Fluid driver and a bass rotor with a massive 15" woofer. The Leslie 3300 is powered with an ear-shattering 300-Watt RMS solid-state amplifier with a vacuum tube preamp. This is the loudest, best sounding portable Leslie ever! Master volume, bass, mid-range, treble, horn level, and sub-woofer level controls are provided. Slow and fast speeds, rise and fall times, and even brake time can be adjusted. A 11-pin and 8-pin Leslie socket as well as a 1/4" line input jack are provided. The Leslie 3300 can be connected to most electronic organs and keyboards on the market today. A 1/4" line output jack suitable to drive an external sub-woofer is also provided.

The Leslie 3300 is housed in a rugged-built cabinet with black finish. The heavy-duty locking casters will make it a snap to transport the Leslie 3300 to your next performance. The Leslie 3300 has been designed to interface directly with all the HAMMOND Single-Channel Organs with 11 pin or 8 pin mini Leslie socket.

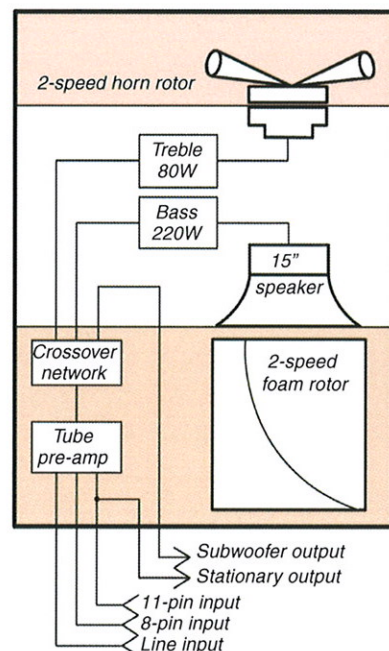

Leslie
